March, 2000

Multi-sized Inflatables

Introducing our new line of Multi-Sized inflatable pipe plugs. These plugs are made from chemically resistant neoprene rubber and reinforced with Kevlar. The broad expansion range of each size makes them ideal for multiple applications (available from 2" to 96"). Some of the highest back pressure capabilities in the industry make these plugs safe and reliable. Bypass and test ports are available on different models giving even greater ease of operation.
